On the Construction Site: Archipad App

No more carrying paper files. Archipad App becomes the interactive assistant for all your travels. Save time on the construction site with the management of reservations, observations, remarks, photo-taking, location on plans, report generation, retrieval of BIM data...

Being efficient on the construction site has never been so simple: monitor the construction sites, clear reservations, access the dashboard, manage projects, documents...

The Archipad construction site tracking software is available on all iPhones and iPads.

At the Office: Archipad Cloud

Archipad Cloud is the web interface of the Archipad construction site tracking software. It allows you to use the **construction management application** from your office with your computer keyboard. The interests and benefits of its use are to **resume and complete** the notes taken on the construction site via the tablet: manage projects, work packages, reservations, collaborators, observations, share work...

With an unlimited number of projects and secure storage, keep your construction projects and synchronize them to access from anywhere.
